AHMED DARWEESH

MANUFACTURING AND MAINTENANCE SENIOR MANAGER

Beni Suef, Egypt | +20 115 988 8350 | eng.ama2003@gmail.com | linkedin.com/in/ahmed-darweesh-62942b116

PROFESSIONAL SUMMARY

Manufacturing and maintenance senior leader with 18+ years of experience in high-volume manufacturing, including 13+ years at Samsung Electronics Egypt. Leadership experience spans manufacturing operations, maintenance, production technology, quality engineering, product engineering, and in-house logistics across 42 production lines. Managed organizations of up to 320 employees, engineering teams of 53, a current maintenance organization of 54, and annual CAPEX and spare-parts expenditure of approximately US$1.5M. Delivered 16% capacity growth, 35% lower machine downtime, 22% lower manufacturing defects, and approximately US$500K in annual operating savings through Lean Manufacturing, reliability improvement, automation, and cross-functional execution.

CORE COMPETENCIES

Manufacturing Operations | Maintenance Management | Operational Excellence | Lean Manufacturing | TPM | OEE | Reliability Engineering | Preventive and Predictive Maintenance | Root Cause Analysis | Capacity Planning | Process Improvement | Factory Automation | Robotics and AGVs | CAPEX Management | Equipment Commissioning | New Line Launch | Production Ramp-Up | Quality Improvement | Cost Reduction | Team Leadership

SELECTED CAREER IMPACT

- Increased factory production capacity by 16% and generated approximately US$500K in annual operating savings through Lean Manufacturing, workflow optimization, and bottleneck elimination.
- Reduced machine downtime by 35%, improved the overall manufacturing defect rate by 22%, and reduced Tablet defects from approximately 24,000 PPM to 6,000 PPM (75% reduction in Tablet defect PPM).
- Led deployment of 62 KUKA robots across eight production lines and introduced AGVs that reduced logistics workforce requirements by 25%.
- Received two Samsung Global Innovation Day Awards, in 2019 and 2022, for manufacturing innovation and engineering excellence.

PROFESSIONAL EXPERIENCE

Maintenance and Innovation Senior Manager | Samsung Electronics Egypt

Beni Suef, Egypt | Jan 2025 – Present

- Lead maintenance and reliability operations across 42 production lines covering TV Assembly, LCM, Press, Injection, EPS, Bonding, and Powder Coating, directing 54 engineers and technicians.
- Manage approximately US$1.5M in annual CAPEX and spare-parts expenditure and coordinate equipment upgrades with Production, Quality, Engineering, Supply Chain, and suppliers.
- Led installation, commissioning, maintenance setup, and production stabilization for new Bonding and Powder Coating technologies through quality audit and mass-production release.
- Established preventive and predictive maintenance strategies for equipment platforms with no previous maintenance history, improving MTBF by 21%.
- Reduced spare-parts cost by 15% through planning, localization, inventory control, and demand forecasting.
- Built and developed maintenance teams through recruitment, technical training, coaching, and structured capability development.

Mobile Manufacturing Senior Manager | Samsung Electronics Egypt

Beni Suef, Egypt | Aug 2023 – Jan 2025

- Led integrated Mobile and Tablet manufacturing operations across Production, Maintenance, Quality Engineering, Product Engineering, and In-house Logistics, directing approximately 320 employees.
- Increased production capacity by 16% through Lean Manufacturing and resource optimization, contributing approximately US$500K in annual operating savings.
- Reduced machine downtime by 35% through reliability improvement and improved the overall manufacturing defect rate by 22% through process control and structured problem-solving.
- Reduced Tablet defects from approximately 24,000 PPM to 6,000 PPM (75% reduction in Tablet defect PPM) through incoming-quality controls, defect mapping, root-cause analysis, and team engagement.
- Managed productivity, quality, loss, scrap, delivery, and equipment KPIs while supporting CEO-level manufacturing transformation initiatives.

Production Technology Senior Manager | Samsung Electronics Egypt

Beni Suef, Egypt | Dec 2012 – Jul 2023

- Directed Production Technology and Manufacturing Engineering across TV Final Assembly, LCM, Press, and CKD/SKD/MKD operations, leading 53 engineers and technicians.
- Led manufacturing setup, equipment installation, commissioning, and ramp-up of the VD facility from empty building to mass-production readiness.
- Commissioned 14 production lines, including seven TV Main Assembly and seven LCM lines, and achieved target production capacity of 12,000 units/day on schedule.
- Recruited, trained, and developed the founding 53-person engineering and technician organization.
- Planned and executed deployment of 62 KUKA industrial robots across eight production lines, improving productivity and process consistency.
- Introduced AGVs for internal material transport, reducing logistics workforce requirements by 25%.
- Established Mobile and Tablet manufacturing lines on an accelerated schedule and delivered production readiness by the planned launch date.
- Received Samsung Global Innovation Day Awards in 2019 and 2022 for manufacturing innovation and engineering excellence.

Preventive Maintenance Section Head | ASEC Automation (ASA)

Bani Suwayf, Egypt | July 2011 – December 2012

Led preventive and predictive maintenance activities at South Valley Cement Factory, supporting equipment reliability, plant availability, and maintenance cost performance.

- Developed and implemented preventive maintenance plans for critical production equipment
- Introduced predictive maintenance practices that reduced maintenance costs and improved intervention planning
- Planned and coordinated major shutdowns, scheduled maintenance, and equipment overhauls
- Worked with Operations and technical teams to prioritize maintenance activities and minimize production disruption
- Monitored maintenance execution and equipment condition to improve reliability and resource utilization

Maintenance Engineer | DEHYDRO FOODS S.A.E

July 2008 – July 2011

Supported electrical, mechanical, and control-system maintenance for a vegetables and herbs dehydration facility.

- Improved productivity on two production lines by converting the final dehydration stage from steam heating to a burner-based indirect heating system
- Designed and developed a microcontroller-based control system for the industrial water-treatment unit
- Supported preventive and corrective maintenance activities to improve production continuity and equipment reliability
- Coordinated maintenance-section compliance with ISO, HACCP, and BRC requirements

Installation Engineer | Hanz Lifts company

Egypt | October 2007 – July 2008

Installed and commissioned elevator control systems using Siemens S7-200 PLCs, inverters, and associated electrical-control components.

- Supported control-panel installation, wiring, testing, and system start-up
- Diagnosed installation and control-system issues during commissioning
- Coordinated technical activities to ensure safe and reliable system operation

TECHNICAL KNOWLEDGE

Automation and Controls: KUKA industrial robots, AGVs, Siemens S7 PLC, Samsung NX PLC, Mitsubishi Q PLC, SCADA, inverters, microcontroller-based control systems

Maintenance and Reliability: TPM, OEE, preventive maintenance, predictive maintenance, MTBF, MTTR, PM compliance, RCA, shutdown planning, spare-parts management

Manufacturing: Lean Manufacturing, capacity planning, workflow optimization, process improvement, equipment commissioning, industrialization, production ramp-up, new-product introduction

EDUCATION

Bachelor of Engineering in Electrical Engineering, Electronics and Communications | Assiut University, Egypt | 2007

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Lean Six Sigma Green Belt - Quality America
- Six Sigma Black Belt Course Completion
- Operations Foundations: Total Productive Maintenance
- Robot Programming and Maintenance - Samsung Global Technology Center
- Project Management Professional Preparation Course - High Performance Academy
- Global Leaders Course - London Business School
- ISO 22000:2005 Internal Auditor | ISO 14001:2004 Internal Auditor

LANGUAGES

Arabic - Native or Bilingual | English - Professional Working Proficiency
